Scientific Day

PLAS@PAR Scientific Day – November 28, 2025, at the Conference Center

Save the date now: you will soon receive an invitation.

On the program: plenary talks, technical presentations, interdisciplinary projects, and poster sessions, all focused on plasma research and its many applications.

The day will include a welcome coffee, convivial moments and poster sessions around a buffet, as well as opportunities for exchanges between participants.

2025 Photo contest

The Scientific Day will also feature the **PLAS@PAR 2025 Photo Contest**: *“Let the images speak, reveal plasma differently.”*

Through this contest, the federation aims to highlight the aesthetics, creativity, and visual richness of plasma research, by building a gallery of inspiring images to showcase plasma.

A jury will award the most striking photo, and the winner will receive an **E-Paper tablet**, a digital device that mimics the appearance of paper, is readable in full sunlight, and energy-efficient.

Submission deadline: November 14th, 2025

Send to: ramja.sivanathan@sorbonne-universite.fr

Meet your lab

Plas@par is organizing a **Meet Your Lab session on October 6th**.

This event will give second-year Master's students in Physics the opportunity to meet around fifteen laboratories presenting their research topics and teams.

The meeting will take place in a friendly atmosphere, with a buffet and a poster session. It will be the perfect time to ask questions and discover the internship and research opportunities available to students.

Volunteer to participate in events and get a gift!

Just a reminder: PLAS@PAR will take part in the Fête de la Science from October 10th to 12th, and students and postdocs who volunteer to help run the booth will **receive a small gift as a token of appreciation!**

Register via [this form](#).

We will also be taking part in this year's edition of Explor'Espace, from November 7th to 9th.

We are looking for people who would help us animate our stands. Register using [this form](#).

ATPEM Days 2025

The **ATPEM Days 2025** will take place from **October 1 to 3** at Jussieu.

This scientific meeting brings together the community working in astroparticle physics and experimental cosmology. It will provide an overview of recent advances, showcase ongoing projects, and highlight the work of young researchers through short “flash” presentations that are short talks allowing, in particular, PhD students to showcase their work. Discussions will be encouraged throughout the sessions, and a buffet dinner will be held on Wednesday, October 1, in the Cassini Hall at the Paris Observatory.

The detailed program is available online: [view the program](#)
